APPLICATION OF RATE: The rate named herein applies only on shipments of commodity named herein, from points named herein, to destinations named herein, for interstate transportation beyond.

[1] [N] Additional charges are applicable for movements beyond Belle Fourche Guernsey HUB to connecting carriers, as set forth in Belle Fourche’s F.E.R.C. No. 129.0.0 and subsequent reissues thereof. Rates [W] set forth herein apply to crude oil delivered into [N] Belle Fourche Guernsey HUB [C] Suncor (Guernsey), Rocky Mountain Pipeline (Ft. Laramie), Eighty Eight Oil LLC (Guernsey), or Upton Rail. Where a gathering service is performed, a charge of [U] 130.28 cents per barrel will be levied; provided, however, that the gathering charge shall not apply to volumes of crude oil delivered to Upton Rail.

[2] Rates apply to sweet and sour crude oil delivered directly into Platte Pipeline (Guernsey). Minimum total nomination from all shippers is 40,000 barrels per month.

[3] Rates apply to sweet crude oil gathered on the pipeline segment between Sand Dunes Unit and House Creek Unit in Converse and Campbell Cos., WY only. Where a gathering service is performed, a charge of [U] 41.02 cents per barrel will be levied.

[4] The 0.2% volume correction for evaporation and loss during transportation, as provided in Item No. 30 in the rules tariff, does not apply to intra-Guernsey movements where such barrels already had the volume correction on Carrier and no additional tanking is required.

[5] Rate applies to the interstate movement of crude oil originating at Guernsey Station and delivered into Rocky Mountain Pipeline at Ft. Laramie Station.

~~[C] [6] Rate applies to all barrels of crude oil delivered directly into the Pony Express Pipeline (Guernsey).~~

[W] [67] Carrier shall levy a Diluent Charge against sour barrels delivered to [W] Belle Fourche Guernsey HUB ~~Guernsey Station, [C] Ft. Laramie Station, Platte Pipeline,~~ and Upton Rail, except for those barrels originating at [W] Belle Fourche Guernsey HUB ~~Guernsey Station~~ ("Total Sour Barrels"). The Diluent Charge to each Shipper shall be calculated as follows:

Diluent Charge to Shipper (\$ per barrel) = Net Cost of Diluent to Carrier per Month ÷ Total Sour Barrels transported by Carrier per Month.

Net Cost of Diluent to Carrier per Month = (Total barrels of Diluent delivered to Carrier's Diluent Receipt Points Per Month multiplied by the Average Monthly Price of Rocky Mountain Sweet Crude at Casper, Wyoming) minus (Total barrels of Diluent sold on behalf of Carrier at Guernsey, Wyoming per Month multiplied by the Average Monthly Price of Wyoming General Sour Crude at Guernsey, Wyoming).

Carrier will provide with each Shipper's monthly invoice a copy of the Diluent Charge calculation, including the Average Monthly Price of Rocky Mountain Sweet Crude at Casper and the Average Monthly Price of Wyoming General Sour Crude at Guernsey. Gravity adjustments will be made per Item No. 68 of Carrier's F.E.R.C. 112.17.0 and subsequent reissues thereof.

Sample Calculation:

Net Cost of Diluent to Carrier Per Month = (18,000 barrels of Diluent x \$50.00 per barrel¹) - (18,000 barrels of Diluent x \$40.00 per barrel²) = \$180,000.

Diluent Charge to Shipper (\$ per barrel) = \$180,000 ÷ 500,000 barrels = \$0.36 per barrel.

¹ Average Monthly Price of Rocky Mountain Sweet Crude at Casper, Wyoming.

² Average Monthly Price of Wyoming General Sour Crude at Guernsey, Wyoming.

~~[C] [8] Rate applies only to barrels delivered directly into Platte Pipeline, Guernsey Station, Platte County, Wyoming.~~
