APPLICATION OF RATE: The rate named herein applies only on shipments of commodity named herein, from points named herein, to destinations named herein, for interstate transportation beyond.

[1] Additional charges are applicable for movements beyond Belle Fourche Guernsey HUB to connecting carriers, as set forth in Belle Fourche's F.E.R.C. No. [W] 129.4.0 129.3.0 and subsequent reissues thereof. Rates set forth herein apply to crude oil delivered into Belle Fourche Guernsey HUB. [C] Where a gathering service is performed, a charge of 142.18 cents per barrel will be levied. No gathering service is performed at Scott Truck Station, Converse Co., WY.

129.4.1

[2] Rates apply to sweet and sour crude oil delivered directly into Platte Pipeline (Guernsey). Minimum total nomination from all shippers is 40,000 barrels per month.

[3] Rates apply to sweet crude oil gathered in Converse and Campbell Cos., WY only. ~~[C] Where a gathering service is performed, a charge of 44.76 cents per barrel will be levied.~~

[4] The 0.2% volume correction for evaporation and loss during transportation, as provided in Item No. 30 in the rules tariff, does not apply to intra-Guernsey movements where such barrels already had the volume correction on Carrier and no additional tanking is required.

[5] Rate applies to the interstate movement of crude oil originating at Guernsey Station and delivered into Rocky Mountain Pipeline at Ft. Laramie Station.

[6] ~~[W] The acreage dedication rates. An incentive rate of 60.00 cents per barrel shall be assessed for movements from Campbell and Converse Counties, WY to the Belle Fourche Guernsey HUB by any shipper that has entered into and has an effective dedication agreement with Belle Fourche Pipeline Company, pursuant to which such shipper has dedicated for shipment on Carrier's System all of the Crude Petroleum produced from a specified drilling spacing unit (or DSU) located within Campbell or Converse County, WY. [C] In addition, where gathering service is performed for such dedication shipper, a discounted gathering charge of 100.00 cents per barrel will be levied.~~

[7] ~~[W] The volume incentive rates. An incentive rate of 60.00 cents per barrel shall be assessed for movements of light sweet Petroleum from Campbell and Converse Counties, WY to the Belle Fourche Guernsey HUB by any Shipper that ships in a given month [W], an average of at least 5,000 barrels per day ("Volume Threshold") [W] of gathered volumes from Campbell and Converse Counties, WY to the Belle Fourche Guernsey HUB. For clarity, only a Shipper's barrels of light sweet Petroleum that are gathered by Belle Fourche [W] in at Campbell and Converse Counties, WY and transported to the Belle Fourche Guernsey HUB shall count towards the Volume Threshold; any volumes credited to Shipper via a line transfer [N] or that are received from Shipper via trucks shall not count towards the Volume Threshold. [C] Any Shipper that qualifies for this incentive rate shall also qualify for a discounted gathering charge of 100.00 cents per barrel for gathering service at Campbell and Converse Counties, WY.~~

[8] Carrier shall levy a Diluent Charge against sour barrels delivered to Belle Fourche Guernsey HUB, except for those barrels originating at Belle Fourche Guernsey HUB ("Total Sour Barrels"). The Diluent Charge to each Shipper shall be calculated as follows:

Diluent Charge to Shipper (\$ per barrel) = Net Cost of Diluent to Carrier per Month ÷ Total Sour Barrels transported by Carrier per Month.

Net Cost of Diluent to Carrier per Month = (Total barrels of Diluent delivered to Carrier's Diluent Receipt Points Per Month multiplied by the Average Monthly Price of Rocky Mountain Sweet Crude at Casper, Wyoming) minus (Total barrels of Diluent sold on behalf of Carrier at Guernsey, Wyoming per Month multiplied by the Average Monthly Price of Wyoming General Sour Crude at Guernsey, Wyoming).

Carrier will provide with each Shipper's monthly invoice a copy of the Diluent Charge calculation, including the Average Monthly Price of Rocky Mountain Sweet Crude at Casper and the Average Monthly Price of Wyoming General Sour Crude at Guernsey. Gravity adjustments will be made per Item No. 68 of Carrier's F.E.R.C. No. 112.20.0 and subsequent reissues thereof.

Sample Calculation:

Net Cost of Diluent to Carrier Per Month = (18,000 barrels of Diluent x \$50.00 per barrel¹) - (18,000 barrels of Diluent x \$40.00 per barrel²) = \$180,000.

Diluent Charge to Shipper (\$ per barrel) = $\$180,000 \div 500,000 \text{ barrels} = \0.36 per barrel .

¹ Average Monthly Price of Rocky Mountain Sweet Crude at Casper, Wyoming.

² Average Monthly Price of Wyoming General Sour Crude at Guernsey, Wyoming.
